## RISKS TO INVESTORS

Summary description of key risk factors based on materiality

- Any shortfall in the supply of our raw material or an increase in raw material costs or other input costs may adversely impact the pricing and supply of our products and have an adverse effect on our business.
- We operate in the electrical equipment industry which is a highly technical and regulated sector and if we fail to comply with the regulations prescribed or standards set by our customers, our business, results of operations, cash flows and financial condition could be adversely affected.
- Our Registered Office and Factory Unit I, from where we currently operate, are not owned by us. If we are unable to renew or continue the lease arrangements on commercially acceptable or favourable terms in the future, it may adversely impact our operations.
- We rely on third-party transportation providers for all of our input materials and product distribution. Failure by any of our transportation providers to deliver our input materials and products on time or at all, could result in loss in sales.
- Negative Growth May Adversely Affect Our Business and Results of Operations
- Our business is dependent and will continue to depend on our manufacturing facilities, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations or strikes, work stoppages or increased wage demands by our employees that could interfere with our operations could have an adverse effect on our business, financial condition and results of operations.
- The loss, shutdown or slowdown of operations at any of our facilities or the under-utilization of any such facilities may have a material effect on our results of operations and financial condition.
- Our company is engaged in the manufacturing of cables and conductors, a segment that forms an integral part of Engineering, Procurement, and Construction (EPC) activities and is inherently working capital intensive.
- Our business significantly relies on ongoing relationships with our customers, many of which are not formalized through long-term contracts. Additionally, we are an approved vendor for several State Electricity Boards, and any failure to maintain this approved status could negatively affect our revenue and profitability.
- We have had negative cash flows from Operating activities in the past and a consequent net decrease in cash and cash equivalents in some of the recent years.

Return on Capital Employed	43.64%	27.85%	15.40%
Debt-Equity Ratio	1.53	2.27	3.25

1. Revenue from Operations: This represents the income generated by the Company from its core operating operation. This gives information regarding the scale of operations. Other Income is the income generated by the Company from its non-core operations.

2. EBITDA means Earnings before interest, taxes, depreciation and amortization expense, which has been arrived at by obtaining the profit before tax/ (loss) for the year / period and adding back interest cost, depreciation, and amortization expense.

3. EBITDA margin is calculated as EBITDA as a percentage of Total Income.

4. Profit for the year/period represents the restated profits of the Company after deducting all expenses.

5. PAT Margin (%) is calculated as Profit for the year/period as a percentage of Revenue from Operations.

6. Return on Net Worth is calculated as Net Profit after tax, as restated, attributable to the owners of the Company for the year/ period divided by Net Worth at the end of respective period/year. Net Worth means aggregate value of the Paid-Up equity Share Capital and reserves & surpluses.

7. Return on capital employed calculated as Earnings before interest (excluding lease liabilities and other borrowing cost) and taxes divided by capital employed as at the end of respective period/year. (Capital employed calculated as the aggregate value of total equity, total debt and deferred tax liability)

8. Debt- equity ratio is calculated by dividing total debt by total equity. Total debt represents long-term and short-term borrowings. Total equity is the sum of share capital and reserves & surpluses.

Note: As certified by M/s Vinod Singh & Co. LLP, Chartered Accountants, pursuant to their certificate dated September 09, 2025.

Weighted average return on net worth for the last 3 FYS, and return on net worth for any interim period for the issuer company

**Return on Net Worth (RoNW):**

Year ended	RoNW(%)	Weight
FY 2022-23	27.05%	1
FY 2023-24	58.49%	2
FY 2024-25	73.89%	3
<b>Weighted Average</b>	<b>60.95%</b>	

(i) RoNW is calculated as net profit after taxation and minority interest attributable to the equity shareholders of the Company divided by shareholders' funds for that year. Shareholders' funds = Share capital + reserves & surplus - revaluation reserves - Reserves created due to amalgamation.

(ii) Networth is computed as the sum of the aggregate of paid up equity share capital, all reserves created out of the profits, securities premium account received in respect of equity shares and debit or credit balance of profit and loss account but excluding revaluation reserves and reserves created due to amalgamation. It may be noted that equity component of financial instruments is excluded while calculating Networth of the Company.

(iii) Weighted Average = Aggregate of year wise weighted RONW divided by the aggregate of weights i.e. (RoNW x Weight) for each year/Total of weights.
